MISSOURI

CRIME AND ARRESTS

DIGEST

FOREWORD

The Missouri Crime Digest represents the first attempt to compile all Missouri crime and arrest data into one easily-referenced publication. This is a significant achievement by the staff of the Missouri Statistical Analysis Center which is being funded by a grant from the Bureau of Justice Statistics, U. S. Department of Justice.

I encourage each criminal justice agency in Missouri to take full advantage of the statistics contained in this report and to forward suggestions or recommendations for additional statisical studies directly to me or to the Statistical Analysis Center. With your cooperation and with the facilities of the Department of Public Safety, we can improve on the collection of statistics to enlighten the general public on the crime trends in Missouri, both actual and projected, with the timeliness required to react to problem areas in a more efficient manner.

Edward D. Daniel, Director
Missouri Department of Public Safety

ACKNOWLEDGEMENTS

The information utilized in this report was obtained from the Federal Bureau of Investigation's Uniform Crime Reporting System. Under current reporting standards, Missouri law enforcement agencies report their crime, arrest and other activities into this system on a voluntary basis.

Without the conscientious efforts of the Missouri law enforcement community in reporting such activity, this publication would not be possible. In addition, a special note of thanks must be given to the Federal Bureau of Investigation's Uniform Crime Reporting Section. This agency provided the Missouri Statistical Analysis Center with the computerized files containing Missouri crime and arrest activity. The staff of this unit also provided technical assistance in the conversion of these files into information subsets which were utilized for analysis purposes. A special note of thanks is given to the following individuals:

1. Mr. Paul Zolbe, Chief, UCR Program
2. Mr. Kenneth Candell, Statistical Assistant, UCR Program
3. Mr. John Kenney, Computer Programmer, UCR Program

The assistance they provided is an outstanding example of federal and state cooperation in the area of criminal justice.

Finally, the contribution provided by the Missouri State Highway Patrol in this project was especially noteworthy. The Highway Patrol provided the computer facility and processing support resources needed to generate the statistics contained in this document. A special note of thanks must be given to the staff of the Information Systems Division, the Research and Development Division and the Public Information Division for their timely assistance in the development of this report.

Mr. Martin P. Carso Jr., Director
Statistical Analysis Center

EXECUTIVE SUMMARY

The purpose of this publication is to provide Missouri State and local public authorities, as well as other interested parties, with an appreciation of the extent and nature of the crime problems facing the State of Missouri. In addition, information has been provided which reveals the amount and nature of the law enforcement activity that has been generated within the Missouri criminal justice system in addressing these problem areas.

This publication will be produced on an annual basis by the Missouri Statistical Analysis Center (SAC). Currently, the primary source of information used for this digest is derived from the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting System (UCR). These digests will be produced annually as data on the next year's crime and arrest activity become available.

Although this publication contains Missouri crime and arrest activity from 1971 through 1981, the emphasis is directed toward the latest reported year (1981). It is recognized that the information utilized is somewhat dated; however, it is anticipated that future digests will be published in a much more timely manner.

The Crime Index is the aggregate of eight major offenses used to indicate the occurrence of crime in the United States. They were selected based on their frequency of occurrence and the fact that they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. The following is a brief analytical description of Missouri's 1981 crime and arrest activity associated with these types of criminal offenses.

The number of known Crime Index offenses rose in the State of Missouri by 16.2 percent in 1981 compared to the annual eleven year average (1971- 1981). In 1981, one Index Crime was committed every 2.1 minutes. In 20.1 of every 100 Index offenses, the cases were cleared by arrest or exceptional means.

Violent offenses made up 10.3 percent of the total 1981 Missouri Crime Index. There were 25,667 Violent Index offenses reported in 1981, an increase of 19.0 percent compared to the annual eleven year average (1971-1981). A violent offense was committed in Missouri every 20.5 minutes. In 45.6 of every 100 violent offenses, the cases were cleared by arrest or exceptional means. The following is brief analysis of the four types of offenses which make up the Violent Index.

- * There were 495 murders reported in 1981, an increase of 11.7 percent compared to the annual eleven year average (1971-1981). While murder is the most serious Index offense it made up less than 0.2 percent of the total 1981 Missouri Crime Index. One murder was committed in the State every 17.7 hours. In 77.2 of every 100 murder offenses, the cases were cleared by arrest or exceptional means. Murder had the highest clearance rate of any of the Index offenses.

- There were 1,395 forcible rapes reported in 1981, an increase of 7.8 percent compared to the annual eleven year average (1971-1981). This type of offense accounted for 0.6 percent of the total 1981 Missouri Crime Index. One forcible rape was reported committed every 6.3 hours. In 55.6 of every 100 forcible rape offenses, the cases were cleared by arrest or exceptional means.

- There were 10,450 robberies reported in 1981, an increase of 8.6 percent compared to the annual eleven year average (1971-1981). Robberies accounted for 4.2 percent of the total 1981 Missouri Crime Index. One robbery occurred every 50.3 minutes. In 26.2 of every 100 robberies, the cases were cleared by arrest or exceptional means.

- There were 13,327 aggravated assaults reported in 1981, an increase of 30.6 percent compared to the annual eleven year average (1971-1981). This offense had the highest increase of all Index offenses compared to the eleven year base. Aggravated assault accounted for 5.3 percent of the total 1981 Missouri Crime Index. One aggravated assault occurred every 39.4 minutes. In 58.8 of every 100 aggravated assaults, the cases were cleared by arrest or exceptional means.

Property offenses made up 89.8 percent of the total 1981 Missouri Crime Index. There were 224,835 Property Index offenses reported in 1981, an increase of 15.9 percent compared to the annual eleven year average (1971-1981). It is estimated that property offenses accounted for $165,750,206 in property stolen or destroyed. One such offense occurred every 2.3 minutes in the State. In 17.2 of every 100 property offenses, the cases were cleared by arrest or exceptional means. A brief analysis of each type of Property Index offense is described below.

- There were 72,773 burglaries reported in 1981, an increase of 17.3 percent compared to the annual eleven year average (1971-1981). Burglaries accounted for 29.1 percent of the total 1981 Missouri Crime Index. One burglary occurred every 7.2 minutes and it is estimated that $54,798,069 in property was stolen in 1981 due to this offense. In 16.4 of every 100 burglaries, the cases were cleared by arrest or exceptional means.

- There were 132,332 thefts reported in 1981, an increase of 18.1 percent compared to the annual eleven year average (1971-1981). Thefts accounted for 52.8 percent of the total 1981 Missouri Crime Index. One theft occurred every 4.0 minutes and it is estimated that $35,521,879 in property was stolen in 1981 due to this offense. In 17.9 of every 100 thefts, the cases were cleared by arrest or exceptional means.

- There were 17,869 motor vehicle thefts reported in 1981, a decrease of 8.6 percent compared to the annual eleven year average (1971-1981). Motor vehicle thefts accounted for 7.1 percent of the total 1981 Missouri Crime Index. One motor vehicle theft occurred every 29.4 minutes and it is estimated that $58,045,838 in property was stolen in 1981 due to this offense. In 14.7 of every 100 motor vehicle thefts, the cases were cleared by arrest or exceptional means.

- There were 1,861 arsons reported in 1981. They accounted for 0.8 percent of the total 1981 Missouri Crime Index. One arson occurred every 4.7 hours and it is estimated that $17,384,420 in property was destroyed due to arson in 1981. In 16.8 of every 100 arsons, the cases were cleared by arrest or exceptional means.

INTRODUCTION

This report was prepared by the Missouri Statistical Analysis Center (SAC), and presents data on crime and arrests in Missouri from 1971 through 1981. Emphasis has been placed on the latest year's (1981) crime and arrest activity. The information contained in this report was submitted on a voluntary basis by Missouri law enforcement agencies into the Federal Bureau of Investigation's (FBI), Uniform Crime Reporting (UCR) System.

The national UCR program was initiated in 1930 by the Committee on Uniform Crime Reports of the International Association of Chiefs of Police (IACP). This Committee developed uniform offense and arrest classifications as well as reporting procedures which could be utilized by law enforcement agencies throughout the nation. The FBI was designated to administer the program and became the national clearinghouse for UCR data. The Committee on Uniform Crime Reports of the IACP continues to serve the national program in an advisory capacity. In 1966, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body for this program and to promote reporting into the UCR Program.

Crime data are, for the most part, collected on a monthly basis in the UCR Program. The FBI provides report forms, tally sheets, and self-addressed envelopes to Missouri law enforcement agencies who complete and return them to the FBI. Certain larger departments submit their reports via computer magnetic tape rather than submitting hard copy reports into the FBI.

It should be noted that there are limitations associated with the information displayed in this report. The fact that this program is voluntary in nature in the State of Missouri increases the problems associated with the completeness and representativeness of the information being captured and analyzed. Certain Missouri law enforcement agencies either do not report into the program or they send incomplete data. In most states, reporting by law enforcement agencies into this program is mandatory through the enactment of state statute.

When utilizing UCR data for report purposes, a number of states and the FBI have used mathematical techniques to estimate total yearly crime and arrest activity. This is done in order to alleviate the problems associated with both non-reporting or incomplete reporting. Although the use of estimation techniques may be a sound principal, based in large part on the methodology used, no estimates were included in this report. This was not done largely due to time constraints. However, the concept of estimation will be considered for future publications.

As a result, discrepancies may be found if comparisions are made with FBI UCR publications covering the same subject area for the State of Missouri. In all instances the FBI publications indicate when an estimation technique was utilized. Discrepancies may also be noted when examining actual reported figures as well. This is a result of updates having been made to the UCR files between the time the FBI report analysis was conducted and the time that the SAC report analysis was performed.

The crime and arrest data contained in this publication are segmented into four parts. The first section displays the Missouri Crime Clock. This clock provides an appreciation of the frequency of occurrence of Crime Index offenses committed in the State in relation to time. The Crime Index is the eight major offenses used to indicate the occurrence of crime in the United States. The eight offenses which make up the total Crime Index are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The second section provides data related to Crime Index offenses committed in the State of Missouri. The intent of the data is to provide an analysis of the various types of Crime Index offenses so that their relative importance can be determined. In addition, Crime Index activity is displayed over time to assess trends. The third section provides a series of data identifying Missouri arrest activity associated with Crime Index offenses as well as for other classes of criminal activity. These displays provide an appreciation of criminal enforcement activity being performed in the State of Missouri by class of crime. The last section provides a series of data and analysis related to each of the eight types of Crime Index offenses. Data are provided which identify crime activity, crime patterns and arrest activity associated with each of these offenses.

1.0 MISSOURI CRIME CLOCK

THE CRIME CLOCK PROVIDES A PERSPECTIVE OF THE 1981 MISSOURI CRIME INDEX PROBLEM IN RELATION TO TIME. FROM THIS PERSPECTIVE, AN APPRECIATION OF THE RELATIVE FREQUENCY OF OCCURRENCE OF SUCH OFFENSES CAN BE OBTAINED.

MISSOURI CRIME CLOCK

1981

ONE INDEX CRIME OFFENSE
EVERY 2.1 MINUTES

- ONE VIOLENT CRIME EVERY 20.5 MINUTES
  - ONE MURDER EVERY 17.7 HOURS
  - ONE FORCIBLE RAPE EVERY 6.3 HOURS
  - ONE ROBBERY EVERY 50.3 MINUTES
  - ONE AGGRAVATED ASSAULT EVERY 39.4 MINUTES
- ONE PROPERTY CRIME EVERY 2.3 MINUTES
  - ONE BURGLARY EVERY 7.2 MINUTES
  - ONE THEFT EVERY 4.0 MINUTES
  - ONE MOTOR VEHICLE THEFT EVERY 29.4 MINUTES
  - ONE ARSON EVERY 4.7 HOURS

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

2.0 MISSOURI CRIME INDEX COMPARISON ANALYSIS

A SERIES OF TABLES AND ILLUSTRATIONS HAS BEEN PROVIDED WHICH DISPLAY CRIME INDEX OFFENSES COMMITTED IN THE STATE OF MISSOURI. THE INTENT OF THESE DISPLAYS IS TO PROVIDE A COMPARASION OF THE VARIOUS TYPES OF CRIME INDEX OFFENSES BEING COMMITTED TO DETERMINE THEIR RELATIVE IMPORTANCE. IN ADDITION, CRIME INDEX ACTIVITY IS DISPLAYED OVER TIME IN ORDER TO ASSESS TRENDS.

TABLE 2.0.1

ARSON[2]	-	-	-	-	-	-	-	-	-	2,194	1,861	-	-

[1] Theft of less than $50 was not an index offense until 1974. However, this class of crime has been included in the 1971 through 1973 Total Index, Property Index and Theft totals to maintain uniformity and comparibility over the eleven year period.

[2] Arson was not reported as an index offense until 1980. In this table, arson figures are included in the Total Index and Property Index totals for 1980 and 1981 but are not reflected in the percent change 1971-1981 (avg) to 1981 or in the average number of offenses.

[3] This column was computed as follows: $\dfrac{\text{1981 Offenses - Average \# of Offenses (1971-1981)}}{\text{Average \# of Offenses (1971-1981)}}$

TABLE 2.0.3

PROPERTY CRIME INDEX

ECONOMIC ANALYSIS

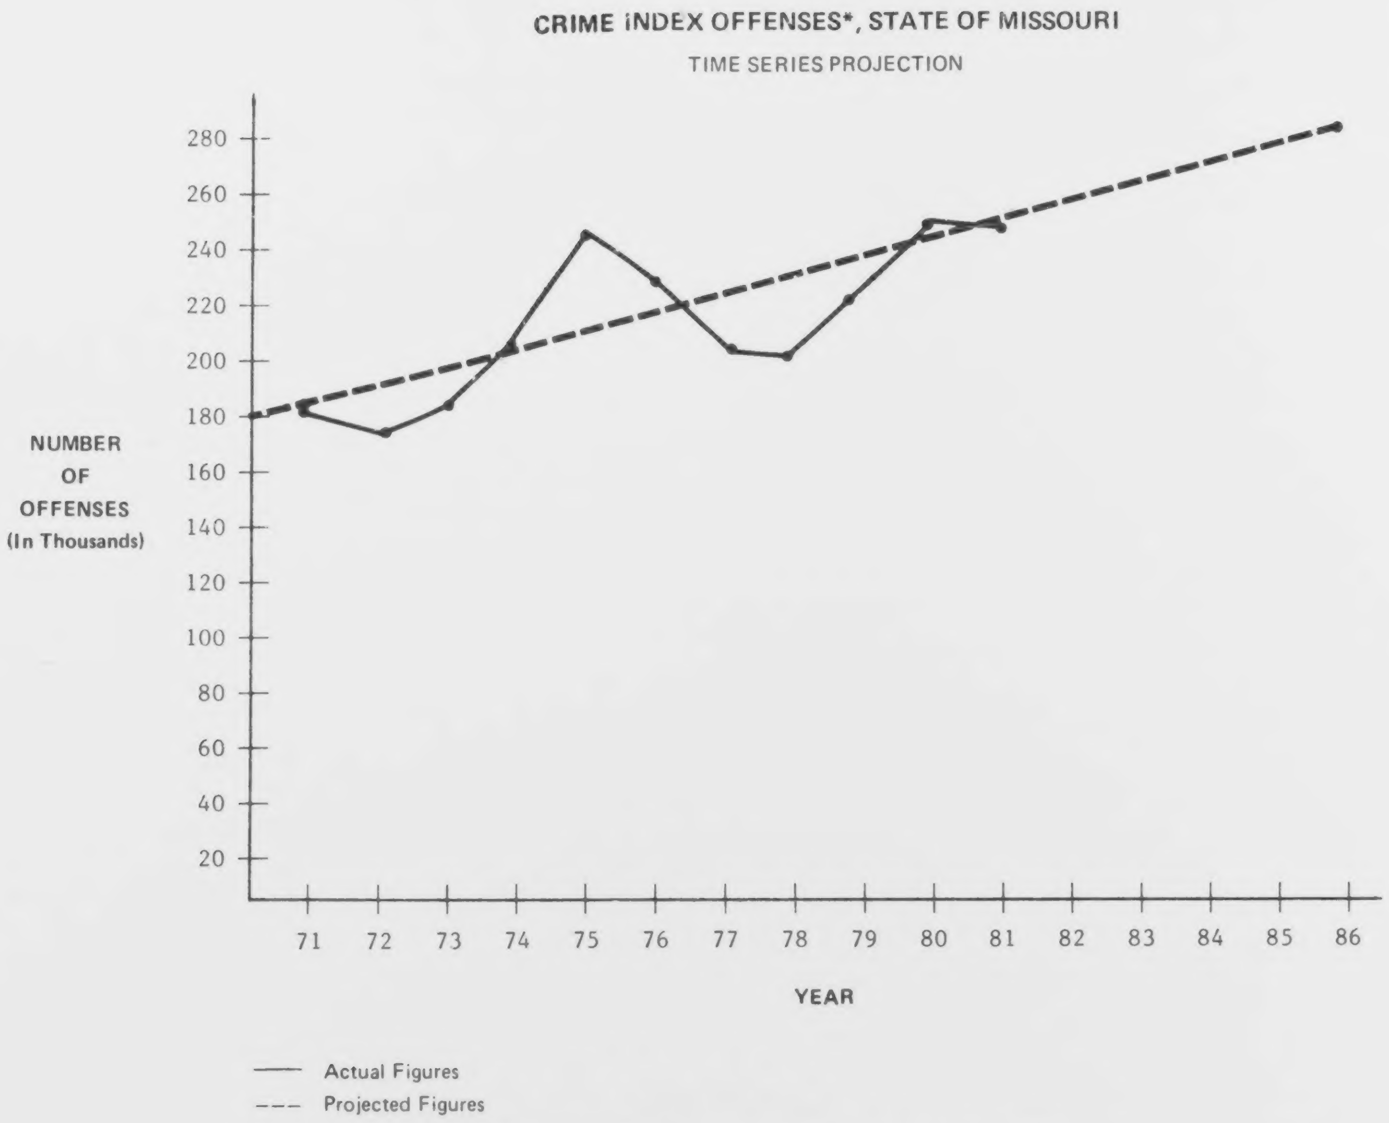
(PROPERTY STOLEN/DESTROYED)

1981

TYPE	$ LOSS PER* OFFENSE	$ ESTIMATE** TOTAL OFFENSES
BURGLARY	753.00	54,798,069
THEFT	268.43	35,521,879
MOTOR VEHICLE THEFT	3,248.41	58,045,838
ARSON	9,341.44	17,384,420
TOTAL	-	$ 165,750,206

*The dollar loss per offense was calculated using only those property offenses in which law enforcement personnel reported an actual dollar amount for the property stolen or destroyed.

**The estimate was calculated by multiplying the dollar loss per offense by the total number of such offenses that were reported in 1981.



* Arson has been excluded since reporting began in 1980.

ARSON[2]	-	-	-	-	-	-	-	-	-	15.4	16.8	-	-

[1] Theft of less than $50 was not an index offense until 1974. However, this class of crime has been included in the 1971 through 1973 Total Index, Property Index and Theft totals to maintain uniformity and comparibility over the eleven year period.

[2] Arson was not reported as an index offense until 1980. In this table, arson figures are included in the Total Index and Property Index totals for 1980 and 1981 but are not reflected in the percent change from 1971 to 1981 or in the average number of offenses.

[3] This column was computed as follows: $$\frac{\text{1981 Clearance Rate - Average Clearance Rate (1971-1981)}}{\text{Average Clearance Rate (1971-1981)}}$$

4.0 MISSOURI DETAIL CRIME INDEX ANALYSIS

A SERIES OF TABLES AND ILLUSTRATIONS HAS BEEN PROVIDED WHICH DISPLAY CRIME ACTIVITY, CRIME PATTERNS, AND ARREST ACTIVITY ASSOCIATED WITH THE INDIVIDUAL TYPES OF CRIME INDEX OFFENSES COMMITTED IN THE STATE OF MISSOURI. DETAIL ANALYSIS IS PROVIDED ON THE FOLLOWING TYPES OF CRIME:

- MURDER
- FORCIBLE RAPE
- ROBBERY
- AGGRAVATED ASSAULT
- BURGLARY
- THEFT
- MOTOR VEHICLE THEFT
- ARSON

4.1 MURDER

DEFINITION

Murder and non-negligent manslaughter, is the willful (non-negligent) killing of one human being by another. Not included in this offense classification are deaths caused by negligence, suicide, accident, justifiable homicide (the killing of a felon by a peace officer in the line of duty or a private citizen during the commission of a felony) and attempts to murder (these are classified as aggravated assaults). Murder offenses are reported on a per victim basis.

1981 SUMMARY ANALYSIS

* There were a total of 495 murders reported during 1981 which was a 3.9 percent reduction from 1980.
* One murder was reported every 17.7 hours.
* Murder accounted for 0.2 percent of the Total Crime Index and 1.9 percent of all Violent Index offenses.
* The murder rate per 100,000 population was 11.2 in 1981 as compared to 11.9 in 1980.
* There was an increase of 11.7 percent in murders in 1981 compared to the annual eleven year average (1971-1981).
* In 1981, 77.2 of every 100 murders were cleared by arrest or exceptional means.
* A total of 490 persons were reported arrested for murder in 1981. Of these, 92.2 percent were adults and 7.8 percent were juveniles.
* Of the murder victims reported, 81.5 percent were male and 18.5 percent were female. Of the total, 92.6 percent were adults and 7.4 percent juveniles.
* In 64.7 percent of the cases the offender used a firearm.

MURDER SUMMARY: 1980 and 1981

*Offender data selected for this analysis involved the first offender associated with the incident and not all offenders that were involved in the crime. In addition, these data were obtained from the UCR Supplemental Homicide File. Certain law enforcement agencies may not have forwarded this additional homicide information when they reported the total number of homicides into the UCR information system.

FIGURE 4.1.1

4.2 FORCIBLE RAPE

DEFINITION

Forcible rape is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included. However statutory rape (without force), sex attacks on males and other types of sex offenses are not included in this category. Forcible rape offenses are reported on a per victim basis.

1981 SUMMARY ANALYSIS

- There were a total of 1,395 rapes reported during 1981, an 8.3 percent reduction from 1980.
- One rape was reported every 6.3 hours.
- Rape accounted for 0.6 percent of the Total Crime Index and 5.4 percent of all Violent Index offenses.
- The rape rate per 100,000 population was 31.4 in 1981 as compared to 35.0 in 1980.
- Actual rape by force constituted 79.7 percent of all reported rapes while attempted rapes accounted for 20.3 percent.
- There was a 7.8 percent increase in rapes in 1981 compared to the annual eleven year average (1971-1981).
- In 1981, 55.6 of every 100 rape cases were cleared by arrest or exceptional means.
- A total of 1,060 persons were reported arrested for rape in 1981. Of these, 86.8 percent were adults and 13.2 percent were juveniles.

4.3 ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. Robbery involves a theft or larceny but is aggravated by the element of force or threat of force. This type of offense is reported on an incident by incident basis.

1981 SUMMARY ANALYSIS

- There were a total of 10,450 robberies reported in 1981, a 3.1 percent decrease from 1980.
- One robbery was reported every 50.3 minutes.
- Robbery accounted for 4.2 percent of the Total Crime Index and 40.7 percent of all Violent Index offenses.
- The robbery rate per 100,000 population was 235.4 in 1981 as compared to 248.2 in 1980.
- In 44.5 percent of all robberies, a firearm was utilized.
- Street robberies were the most prevalent class of robbery accounting for 65.3 percent of all such offenses.
- There was an 8.6 percent increase in robbery in 1981 as compared to the annual eleven year average (1971-1981).
- In 26.2 percent of the cases, robbery offenses were cleared by arrest or exceptional means in 1981.
- A total of 2,958 persons were reported arrested for robbery in 1981. Of these 80.4 percent were adults and 19.6 were juveniles.

4.4 AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack or attempted attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. All assaults or attempted assaults by one person upon another with the intent to kill, maim or inflict severe bodily injury with the use of any dangerous weapon are classified under this category of offense. This offense is reported on a per victim basis.

1981 SUMMARY ANALYSIS

- There were a total of 13,327 aggravated assaults reported in 1981, a 0.2 percent increase over 1980.
- One aggravated assault was reported every 39.4 minutes.
- Aggravated assault accounted for 5.3 percent of the Total Crime Index and 51.9 percent of all Violent Index offenses.
- The aggravated assault rate per 100,000 population was 300.2 in 1981 as compared to 306.2 in 1980.
- A firearm was used in 26.1 percent of the cases.
- There was an increase of 30.6 percent in aggravated assaults in 1981 compared to the annual eleven year average (1971-81).
- In 1981, 58.8 of every 100 cases were cleared by arrest or exceptional means.
- A total of 7,209 persons were reported arrested for aggravated assault in 1981. Of these, 87.3 percent were adults and 12.7 were juveniles.

4.5 BURGLARY

DEFINITION

Burglary is the unlawful entry or attempted unlawful entry of a structure to commit a felony or a theft. Burglary is reported on per distinct incident basis.

1981 SUMMARY ANALYSIS

- There were a total of 72,773 burglaries reported during 1981 which was a 4.7 percent decrease from 1980.
- One burglary was reported every 7.2 minutes.
- Burglary accounts for 29.1 percent of the Total Crime Index and 32.4 percent of all Property Index offenses.
- The burglary rate per 100,000 population was 1,639.4 in 1981 as compared to 1,756.2 in 1980.
- Of all burglaries, 71.4 percent involved a residential dwelling and 70.0 percent were accomplished by forcible entry.
- There was a 17.3 percent increase in burglaries in 1981 compared to the annual eleven year average (1971-1981).
- In 1981, 16.4 of every 100 burglaries were cleared by arrest or exceptional means.
- A total of 10,906 persons were reported arrested for burglary in 1981. Of these, 68.2 percent were adults and 31.8 percent were juveniles.

4.6 THEFT

DEFINITION

Theft is the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. Attempted thefts are also included. This category includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts or accessories, bicycle thefts, etc., in which no use of force, violence or fraud occurs. It does not include embezzlement, "con" games, forgery or worthless checks. Motor vehicle theft is also excluded inasmuch as it is a separate crime index offense. Theft offenses are reported on a per distinct incident basis.

1981 SUMMARY ANALYSIS

- There were a total of 132,332 thefts reported during 1981. This figure is 1.9 percent higher than in 1980.
- One theft was reported every 4 minutes.
- Theft accounts for 52.8 percent of the Total Crime Index and 58.9 percent of all Property Index offenses.
- The theft rate per 100,000 population in 1981 was 2,981.1 as compared to the previous year's rate of 2,988.8.
- Of all thefts, 45.5 percent involved the taking of vehicle parts/accessories or other types of property from a vehicle.
- There was an increase of 18.1 percent in thefts in 1981 compared to the annual eleven year average (1971-1981).
- In 1981, 17.9 of every 100 thefts were cleared by arrest or exceptional means.
- A total of 26,152 persons were reported arrested for theft in 1981. Of these, 75.2 percent were adults and 24.8 percent were juveniles.

4.7 MOTOR VEHICLE THEFT

DEFINITION

Motor vehicle theft is the theft or attempted theft of a motor vehicle. A motor vehicle is defined as a self-propelled vehicle that runs on the surface and not on rails. Motor vehicles include automobiles, trucks, buses, motorcycles, motor scooters, snowmobiles, etc. Motor vehicle theft is reported on a per vehicle basis.

1981 SUMMARY ANALYSIS

- There were a total of 17,869 motor vehicle thefts reported during 1981 which was a decrease of 7.7 percent from 1980.
- One motor vehicle theft occurred every 29.4 minutes.
- Motor vehicle theft accounted for 7.1 percent of the Total Crime Index and 8.0 percent of all Property Index offenses.
- The motor vehicle theft rate per 100,000 population was 402.5 in 1981 compared to 445.5 in 1980.
- Of vehicles stolen in 1981, it is estimated that 60.0 percent were recovered.
- There was an 8.6 percent decrease in motor vehicle theft in 1981 compared to the annual eleven year average (1971-1981).
- In 1981, 14.7 of every 100 cases were cleared by arrest or exceptional means.
- A total of 1,683 persons were reported arrested for motor vehicle theft in 1981. Of these, 67.7 were adults and 32.3 percent were juveniles.

MOTOR VEHICLE THEFT SUMMARY: 1980 and 1981

Year	Number of Offenses	Rate per 100,000 Population
1980	19,358	445.5
1981	17,869	402.5
Percent of Change	- 7.7	- 9.7

4.8 ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded. Arson offenses are reported on a per distinct incident basis.

1981 SUMMARY ANALYSIS

- There were a total of 1,861 arsons reported in 1981, a 15.2 percent reduction from 1980.
- It is estimated that arsons accounted for over 17 million dollars in property loss in 1981.
- One arson was reported every 4.7 hours.
- Arsons accounted for 0.8 percent of the Total Crime Index and 0.8 percent of all Property Index Offenses.
- The arson rate per 100,000 population was 44.0 in 1981 as compared to 51.3 in 1980.
- In 1981, 16.8 of every 100 arson cases were cleared by arrest or exceptional means.
- A total of 424 persons were reported arrested for arson in 1981. Of these, 69.6 percent were adults and 30.4 percent were juveniles.

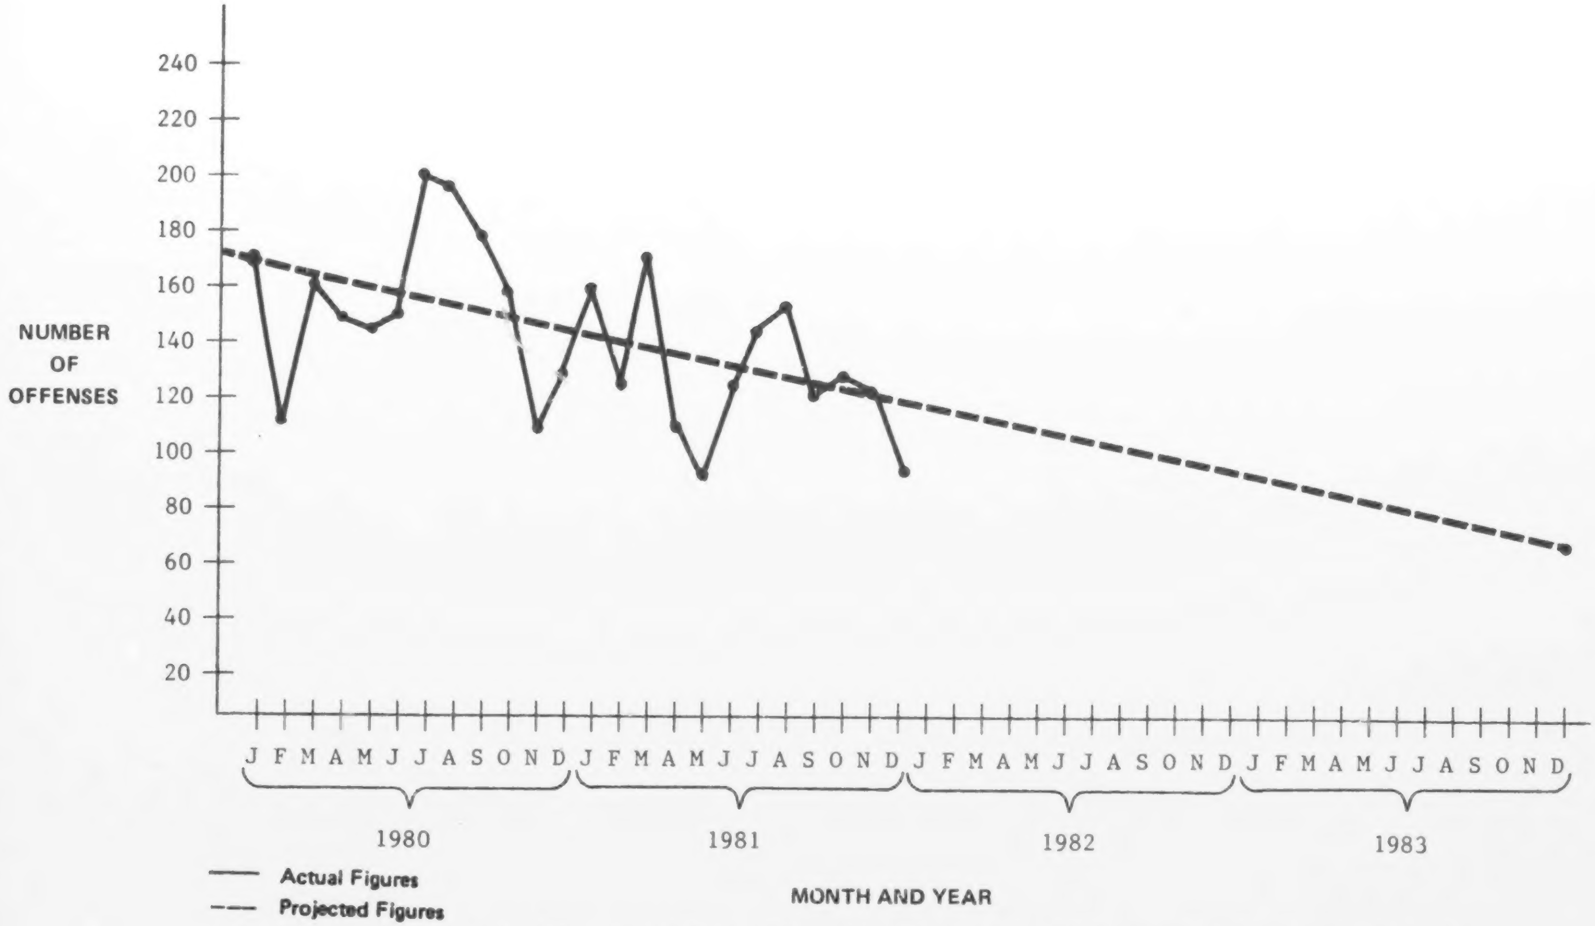
MISSOURI ARSON OFFENSES*

TIME SERIES PROJECTION



* Only arson activity for those law enforcement agencies which completely reported during 1980 and 1981 were included in this time series projection.

FIGURE 4.8.1

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence for intoxicants and arrests in connection with negligent manslaughter in traffic accidents are not scored. Included are those persons arrested but released without being formally charged.

CLEARANCE: The resolution of a criminal offense by the arrest, charging and turning over to the court for prosecution of one or more persons alleged to have commited the crime. An offense can also be cleared by exceptional means when the law enforcement agency has: 1) established the identity of the offender, 2) has enough information to support an arrest, charge and prosecution in court, 3) the exact location of the offender is known so that he/she could be taken into custody and 4) there is some reason outside law enforcement control that precludes arresting, charging and prosecuting the offender, (Ex. offender died).

CLEARED OFFENSES ONLY JUVENILES: The number of clearances for an offense in which only juveniles were arrested or were identified as the offender but for some valid reason could not be arrested divided by the total number of clearances for that offense expressed as a percentage. The formula is:

$$\frac{\text{Number of Offenses Cleared Involving Only Juveniles}}{\text{Number of Clearances}} \quad X \quad 100\%$$

CLEARANCE RATES: The number of clearances divided by the total number of offenses, expressed as a percentage. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \quad X \quad 100\%$$

CRIME INDEX: The Crime Index is the sum of eight major offenses used to indicate the occurrence of crime in the United States. They were selected based on their frequency of occurrence and the fact that they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. Definitions of each of the offenses making up the Crime Index are provided in the section entitled "Statewide Detail Crime and Arrest Analysis".

CRIME OFFENSE: In the UCR Program, the offenses of murder, forcible rape and aggravated assault are crimes against persons. For these crimes, one crime offense is counted for each victim. Robbery, burglary, theft, motor vehicle theft and arson are crimes against property. For these crimes, with the exception of motor vehicle theft, one crime offense is counted for each distinct operation. In the case of motor vehicle theft, one crime offense is counted for each stolen vehicle.

JUVENILE: A person under 18 years of age.

JUVENILE ARREST: Arrests in the case of juveniles are reported if the juvenile committed an offense which, if committed by an adult, would result in the arrest being scored. Also included are police or other official actions taken, beyond mere admonishment, in response to juvenile violations such as status offenses. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored since they have not committed any crime.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period - Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: The total number of persons residing in a jurisdiction based on United States Census data.

FOREWORD

The 1982 Missouri Crime Digest is the second major publication on crime and arrest statistics produced by the Missouri Statistical Analysis Center in the past year. The Center is currently funded by a grant from the Bureau of Justice Statistics, U.S. Department of Justice.

This publication extends the presentation of crime and arrest statistics from 1973 through 1982. The 1982 Digest provides for more accurate forecasting of future crime rates, geographical presentation of crime data by county, crime and arrest data by reporting agency, and a new statistic -- arrest rates per 100,000 population.

Many agencies have commented on the usefulness of the 1981 Digest and the 1982 Digest provides a more current view of crime in Missouri. The Center provides an important new service to the criminal justice system. Agencies which need assistance in the area of research may contact the Center directly for assistance.

Edward D. Daniel, Director
Missouri Department of Public Safety

ACKNOWLEDGEMENTS

Data used in the preparation of the Missouri Crime and Arrest Digest were largely drawn from the Federal Bureau of Investigation's Uniform Crime Reporting System. The Federal Bureau of Investigation provided the Statistical Analysis Center with computerized files containing data on crime and arrest activity in the State of Missouri. Their staff also assisted in converting these files to specific data subsets for statistical analysis purposes. The professionalism of their staff and their willingness to help significantly contributed to the development of this publication. A special note of thanks is given to the following individuals:

Mr. Paul Zolbe, Chief, UCR Program

Mr. Kenneth Candell, Statistical Assistant, UCR Program

Mr. John Kenney, Computer Programmer, UCR Program

Under current practices, Missouri law enforcement agencies report crime, arrest and other activities to the Federal Bureau of Investigation's Uniform Crime Reporting Program on a voluntary basis. Without the conscientious efforts of the Missouri law enforcement community in reporting such activity, this Digest would not be possible.

The contribution made by the Missouri State Highway Patrol in the development of this Digest is especially noteworthy. The Highway Patrol provided the computer facility and data processing resources needed to organize and display the data contained in this document. A special note of thanks must be given to the staff of the Information Systems Division, the Research and Development Division and the Public Information Division for their timely assistance.

Finally, appreciation is extended to the U.S. Department of Justice, Bureau of Justice Statistics for providing grant funds to support the development, publication and dissemination of all criminal justice publications produced by the Missouri Statistical Analysis Center.

Martin P. Carso Jr., Director
Missouri Statistical Analysis Center

EXECUTIVE SUMMARY

The purpose of this Digest is to provide criminal justice authorities and other interested parties with summary data on crime and law enforcement activity in the State of Missouri.

The Digest is produced annually by the Missouri Statistical Analysis Center (SAC). The primary source of data for the Digest is the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting System (UCR). Although this publication contains Missouri crime and arrest activity from 1973 through 1982, emphasis is placed on data reported in the most recent year (1982).

The Crime Index is the sum of eight major offenses and is used to measure the magnitude of crime in the United States. The major offenses are included in the index because of their frequency of occurrence and the fact that they are most likely to be reported to law enforcement agencies. These eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. The following is a brief description of Missouri's 1982 crime and arrest activity associated with these types of criminal offenses.

In 1982, a total of 233,084 Crime Index offenses were reported in the State of Missouri. This was a 3.3 percent increase compared to the annual ten year average (1973-1982). In recent years, however, Crime Index offenses have been on the decline. There was a 7.0 percent reduction in such offenses in 1982 compared to 1981. In 1982, one Index Crime was committed every 2.3 minutes.

Violent offenses made up 10.4 percent of the total 1982 Missouri Crime Index. There were 24,233 Violent Index offenses reported in 1982, an increase of 7.1 percent compared to the annual ten year average (1973-1982). However, Missouri experienced a reduction of 5.6 percent in this class of offense in 1982 compared to 1981. A violent offense was committed in Missouri every 21.7 minutes. A brief analysis of each type of Violent Index offense is given below.

* There were 454 murders reported in 1982, a decrease of 0.4 percent compared to the annual ten year average (1973-1982) and a decrease of 8.3 percent compared to 1981. While murder is the most serious Index offense, it made up less than 0.2 percent of the total 1982 Missouri Crime Index. One murder was committed in the State every 19.3 hours.

* There were 1,228 forcible rapes reported in 1982, a decrease of 6.6 percent compared to the annual ten year average (1973-1982) and a decrease of 12.0 percent compared to 1981. Forcible rape accounted for 0.5 percent of the total 1982 Missouri Crime Index. One forcible rape was reported committed every 7.1 hours.

- There were 9,397 robberies reported in 1982, a decrease of 4.7 percent compared to the annual ten year average (1973-1982) and a decrease of 10.1 percent compared to 1981. Robbery accounted for 4.0 percent of the total 1982 Missouri Crime Index. One robbery occurred every 55.9 minutes.

- There were 13,154 aggravated assaults reported in 1982, an increase of 19.5 percent compared to the annual ten year average (1973-1982) but a decrease of 1.3 percent compared to 1981. Aggravated assault had the highest increase of all Index offenses compared to the ten year base. Aggravated assault accounted for 5.6 percent of the total 1982 Missouri Crime Index. One aggravated assault occurred every 40.0 minutes.

Property offenses made up 89.6 percent of the total 1982 Missouri Crime Index. There were 208,851 Property Index offenses reported in 1982, an increase of 2.9 percent compared to the annual ten year average (1973-1982) but a decrease of 7.1 percent compared to 1981. It is estimated that property offenses accounted for $166,568,514 in property stolen or destroyed. One such offense occurred every 2.5 minutes in the State. A brief analysis of each type of Property Index offense is given below.

- There were 64,527 burglaries reported in 1982, a decrease of 0.2 percent compared to the annual ten year average (1973-1982) and a decrease of 11.3 percent from 1981. Burglary accounted for 27.7 percent of the total 1982 Missouri Crime Index. One burglary occurred every 8.1 minutes and it is estimated that $48,164,243 in property was stolen in 1982 due to this offense.

- There were 126,868 thefts reported in 1982, an increase of 7.4 percent compared to the annual ten year average (1973-1982) but a decrease of 4.1 percent compared to 1981. Theft accounted for 54.4 percent of the total 1982 Missouri Crime Index. One theft occurred every 4.1 minutes and it is estimated that $37,716,588 in property was stolen in 1982 due to this offense.

- There were 15,767 motor vehicle thefts reported in 1982, a decrease of 15.1 percent compared to the annual ten year average (1973-1982) and a decrease of 11.8 percent compared to 1981. Motor vehicle theft accounted for 6.8 percent of the total 1982 Missouri Crime Index. One motor vehicle theft occurred every 33.3 minutes and it is estimated that $59,699,696 in property was stolen in 1982 due to this offense.

- There were 1,689 arsons reported in 1982, a decrease of 9.2 percent compared to 1981. Arson accounted for 0.7 percent of the total 1982 Missouri Crime Index. One arson occurred every 5.2 hours and it is estimated that $20,987,987 in property was destroyed due to arson in 1982.

INTRODUCTION

This Digest was prepared by the Missouri Statistical Analysis Center (SAC) and presents selected data on crime and arrest activity in Missouri from 1973 through 1982. Emphasis has been placed on the most recent year's (1982) crime and arrest activity. Information reported in this Digest was submitted on a voluntary basis by Missouri law enforcement agencies to the Federal Bureau of Investigation's (FBI), Uniform Crime Reporting (UCR) Program.

The national UCR program was initiated in 1930 by the Committee on Uniform Crime Reports of the International Association of Chiefs of Police (IACP). This Committee developed uniform offense and arrest classifications as well as reporting procedures which could be utilized by law enforcement agencies throughout the nation. The FBI was designated to administer the program and became the national clearinghouse for UCR data. The Committee on Uniform Crime Reports of the IACP continues to serve the national program in an advisory capacity. In 1966, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body for this program and to promote reporting to the UCR Program.

Crime data are, for the most part, collected on a monthly basis in the UCR Program. The FBI provides report forms, tally sheets, and self-addressed envelopes to Missouri law enforcement agencies who complete and return them to the FBI.

It should be noted that there are limitations associated with the information displayed in this report. The fact that this program is voluntary in nature in the State of Missouri increases the problems associated with the completeness and representativeness of the information being captured and analyzed. Certain Missouri law enforcement agencies either do not report to the program or they send incomplete data. In most states, reporting to this program by law enforcement agencies is mandatory through the enactment of state statute.

To reduce the problems associated with both non-reporting and incomplete reporting, a number of states and the FBI have used mathematical techniques to estimate total yearly crime and arrest activity. No such techniques have been applied to the data reported in this Digest.

As a result, discrepancies may be found if comparisions are made with FBI UCR publications covering the same subject area for the State of Missouri. In all instances, the FBI publications indicate when an estimation technique was utilized. Discrepancies may also be noted when examining actual reported figures. This is a result of updates having been made to the UCR files between the time the FBI data were processed and the time the SAC analysis was performed.

The crime and arrest data contained in this publication are segmented into five parts. The first section displays the Missouri Crime Clock. This clock offers an overview of the frequency of occurrence of Crime Index offenses committed in the State in relation to time. The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. The eight offenses making up the total Crime Index are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The second section provides data related to Crime Index offenses committed in the State of Missouri. Its purpose is to provide a comparison of the various types of Crime Index offenses so that their relative importance can be assessed. In addition, Crime Index activity is displayed by geographical regions of the State and also over time to observe trends. The third section presents data on arrest activity associated with Crime Index offenses as well as other classes of criminal offenses. These data provide an appreciation of criminal enforcement activity being performed in the State of Missouri by class of crime. The fourth section provides a series of data and analysis related to each of the eight types of Crime Index offenses. Data are provided on crime activity, crime patterns and arrest activity associated with each of these offenses. Finally, the last section provides summary data on Crime Index offenses and arrest activity for specific law enforcement jurisdictions in the State of Missouri.

1.0 MISSOURI CRIME CLOCK

THE CRIME CLOCK SUMMARIZES CRIMINAL ACTIVITY IN THE STATE OF MISSOURI DURING 1982 IN RELATION TO TIME. FROM THIS PERSPECTIVE, AN APPRECIATION OF THE RELATIVE FREQUENCY OF VARIOUS CRIMINAL OFFENSES CAN BE OBTAINED. THE CRIME CLOCK SHOULD BE VIEWED WITH CARE. BEING THE MOST AGGREGATE REPRESENTATION OF UCR DATA, IT IS DESIGNED TO CONVEY THE ANNUAL REPORTED CRIME EXPERIENCE BY SHOWING THE RELATIVE FREQUENCY OF OCCURRENCE OF THE INDEX OFFENSES. THIS MODE OF DISPLAY SHOULD NOT BE TAKEN TO IMPLY A REGULARITY IN THE COMMISSION OF CRIME; RATHER, IT REPRESENTS THE ANNUAL RATIO OF CRIME TO FIXED TIME INTERVALS.

MISSOURI CRIME CLOCK

1982

ONE INDEX CRIME OFFENSE
EVERY 2.3 MINUTES

ONE VIOLENT CRIME
EVERY 21.7 MINUTES

- ONE MURDER EVERY 19.3 HOURS
- ONE FORCIBLE RAPE EVERY 7.1 HOURS
- ONE ROBBERY EVERY 55.9 MINUTES
- ONE AGGRAVATED ASSAULT EVERY 40.0 MINUTES

ONE PROPERTY CRIME
EVERY 2.5 MINUTES

- ONE BURGLARY EVERY 8.1 MINUTES
- ONE THEFT EVERY 4.1 MINUTES
- ONE MOTOR VEHICLE THEFT EVERY 33.3 MINUTES
- ONE ARSON EVERY 5.2 HOURS

2.0 MISSOURI CRIME INDEX COMPARISON ANALYSIS

A SERIES OF TABLES AND FIGURES SUMMARIZES CRIME INDEX OFFENSES COMMITMITTED IN THE STATE OF MISSOURI. THE PURPOSE OF THESE DISPLAYS IS TO COMPARE THE VARIOUS TYPES OF CRIME INDEX OFFENSES BEING COMMITTED ACCORDING TO THEIR RELATIVE CONTRIBUTION TO THE CRIME INDEX. IN ADDITION, CRIME INDEX ACTIVITY IS DISPLAYED BY GEOGRAPHICAL REGIONS OF THE STATE AND OVER TIME IN ORDER TO OBSERVE TRENDS.

ARSON[2]	-	-	-	-	-	-	-	2,194	1,861	1,689	-	-
NUMBER OF REPORTING AGENCIES[4]	199	198	202	205	216	223	219	229	237	238	-	-

[1] This column was computed as follows: $\dfrac{\text{1982 Offenses - Average \# of Offenses (1973-1982)}}{\text{Average \# of Offenses (1973-1982)}}$

[2] Arson was not reported as an index offense until 1980. In this table, arson figures are included in the Total Index and Property Index totals for 1980-1982 but are not included in the percent change 1973-1982 (avg.) to 1982 or in the average number of offenses.

[3] Theft of less than $50 was not an index offense until 1974. However, this class of crime has been included in the 1973 Total Index, Property Index and Theft totals to maintain uniformity and comparibility over the ten-year period.

[4] Number of law enforcement agencies that reported crime index offense activity to the UCR system in a given year.

TABLE 2.0.2

PROPERTY CRIME INDEX

ECONOMIC ANALYSIS

(PROPERTY STOLEN/DESTROYED)

1982

TYPE	LOSS PER[1] OFFENSE	ESTIMATE[2] TOTAL OFFENSES
BURGLARY	$746.42	$48,164,243
THEFT	297.29	37,716,588
MOTOR VEHICLE THEFT	3,786.37	59,699,696
ARSON	12,426.28	20,987,987
TOTAL	-	$166,568,514

[1] The dollar loss per offense was calculated using only those property offenses for which law enforcement agencies reported an actual dollar amount for the property stolen or destroyed.

[2] The estimate was calculated by multiplying the dollar loss per offense by the total number of such offenses that were reported in 1982.

FIGURE 3.0.3

4.0 MISSOURI DETAIL CRIME INDEX ANALYSIS

A SERIES OF TABLES AND FIGURES SUMMARIZES CRIME ACTIVITY, CRIME PATTERNS, AND ARREST ACTIVITY ASSOCIATED WITH SPECIFIC TYPES OF CRIME INDEX OFFENSES COMMITTED IN THE STATE OF MISSOURI. DETAIL ANALYSIS IS PROVIDED ON THE FOLLOWING TYPES OF CRIME:

* MURDER
* FORCIBLE RAPE
* ROBBERY
* AGGRAVATED ASSAULT
* BURGLARY
* THEFT
* MOTOR VEHICLE THEFT
* ARSON

4.1 MURDER

DEFINITION

Murder and non-negligent manslaughter, is the willful killing of one human being by another. Not included in this offense classification are deaths caused by negligence, suicide, accident, justifiable homicide (the killing of a felon by a peace officer in the line of duty or a private citizen during the commission of a felony) and attempts to murder (these are classified as aggravated assaults). Murder offenses are reported on a per victim basis.

1982 SUMMARY ANALYSIS

- There were 454 murders reported during 1982 which was an 8.3 percent reduction from 1981.
- One murder was reported every 19.3 hours.
- Murder accounted for 0.2 percent of the Total Crime Index and 1.9 percent of all Violent Index offenses.
- The murder rate per 100,000 population was 10.3 in 1982 compared to 11.2 in 1981.
- There was a 0.4 percent decrease in murders in 1982 compared to the annual ten year average (1973-1982).
- 462 persons were reported arrested for murder in 1982. Of these, 89.9 percent were adults and 10.1 percent were juveniles.
- Of the murder victims reported, 77.3 percent were male and 22.5 percent were female. For 0.2 percent the sex of the victim was not reported. Of the total, 90.1 percent were adults and 9.0 percent juveniles.
- In 63.8 percent of the cases the offender used a firearm.

MURDER SUMMARY: 1981 and 1982

Year	Number of Offenses	Rate per 100,000 Population
1981	495	11.2
1982	454	10.3
Percent of Change	- 8.3	- 8.0

4.2 FORCIBLE RAPE

DEFINITION

Forcible rape is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included. However statutory rape (without force), sex attacks on males and other types of sex offenses are not included in this category. Forcible rape offenses are reported on a per victim basis.

1982 SUMMARY ANALYSIS

* There were 1,228 rapes reported during 1982 which was a 12.0 percent reduction from 1981.
* One rape was reported every 7.1 hours.
* Rape accounted for 0.5 percent of the Total Crime Index and 5.1 percent of all Violent Index offenses.
* The rape rate per 100,000 population was 27.8 in 1982 compared to 31.4 in 1981.
* Actual rape by force constituted 79.4 percent of all reported rapes while attempted rapes accounted for 20.6 percent.
* There was a 6.6 percent decrease in rapes in 1982 compared to the annual ten year average (1973-1982).
* 1,031 persons were reported arrested for rape in 1982.
* Of those persons arrested for rape in 1982, 84.9 percent were adults and 15.1 percent were juveniles.

4.3 ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. Robbery involves a theft or larceny but is aggravated by the element of force or threat of force. Robbery offenses are reported on an incident by incident basis.

1982 SUMMARY ANALYSIS

- There were 9,397 robberies reported in 1982 which was a 10.1 percent decrease from 1981.
- One robbery was reported every 55.9 minutes.
- Robbery accounted for 4.0 percent of the Total Crime Index and 38.8 percent of all Violent Index offenses.
- The robbery rate per 100,000 population was 212.7 in 1982 compared to 235.4 in 1981.
- In 44.0 percent of all robberies, a firearm was used.
- Street robbery was the most prevalent class of robbery accounting for 66.9 percent of all such offenses.
- There was a 4.7 percent decrease in robbery in 1982 compared to the annual ten year average (1973-1982).
- It is estimated that $5,351,686 in property was stolen in 1982 due to this offense.
- 2,901 persons were reported arrested for robbery in 1982. Of these, 80.1 percent were adults and 19.9 percent were juveniles.

ROBBERY SUMMARY: 1981 and 1982

4.4 AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack or attempted attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. All assaults or attempted assaults by one person upon another with the intent to kill, maim or inflict severe bodily injury with the use of any dangerous weapon are classified under this category of offense. Aggravated assault offenses are reported on a per victim basis.

1982 SUMMARY ANALYSIS

- There were 13,154 aggravated assaults reported in 1982 which was a 1.3 percent decrease from 1981.
- One aggravated assault was reported every 40.0 minutes.
- Aggravated assault accounted for 5.6 percent of the Total Crime Index and 54.3 percent of all Violent Index offenses.
- The aggravated assault rate per 100,000 population was 297.7 in 1982 compared to 300.2 in 1981.
- A firearm was used in 23.9 percent of the cases.
- There was a 19.5 percent increase in aggravated assaults in 1982 compared to the annual ten year average (1973-1982).
- 7,592 persons were reported arrested for aggravated assault in 1982. Of these, 87.3 percent were adults and 12.7 percent were juveniles.

4.5 BURGLARY

DEFINITION

Burglary is the unlawful entry or attempted unlawful entry of a structure to commit a felony or a theft. Burglary offenses are reported on an incident by incident basis.

1982 SUMMARY ANALYSIS

- There were 64,527 burglaries reported during 1982 which was an 11.3 percent decrease from 1981.
- One burglary was reported every 8.1 minutes.
- Burglary accounted for 27.7 percent of the Total Crime Index and 30.9 percent of all Property Index offenses.
- The burglary rate per 100,000 population was 1,460.3 in 1982 compared to 1,639.4 in 1981.
- Of all burglaries, 68.2 percent involved a residential dwelling and 68.7 percent were accomplished by forcible entry.
- There was a 0.2 percent decrease in burglaries in 1982 compared to the annual ten year average (1973-1982).
- It is estimated that $48,164,243 in property was stolen in 1982 due to this offense.
- 10,374 persons were reported arrested for burglary in 1982. Of these, 68.7 percent were adults and 31.3 percent were niles.

FIGURE 4.5.1

4.6 THEFT

DEFINITION

Theft is the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. Attempted thefts are also included. This category includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts or accessories, bicycle thefts, etc., in which no use of force, violence or fraud occurs. It does not include embezzlement, "con" games, forgery or worthless checks. Motor vehicle theft is also excluded inasmuch as it is a separate crime index offense. Theft offenses are reported on an incident by incident basis.

1982 SUMMARY ANALYSIS

* There were 126,868 thefts reported during 1982 which was a 4.1 percent decrease over 1981.
* One theft was reported every 4.1 minutes.
* Theft accounted for 54.4 percent of the Total Crime Index and 60.7 percent of all Property Index offenses.
* The theft rate per 100,000 population in 1982 was 2,871.2 compared to 2,981.1 in 1981.
* Of all thefts, 46.2 percent involved the taking of vehicle parts/accessories or other types of property from a vehicle.
* There was a 7.4 percent increase in thefts in 1982 compared to the annual ten year average (1973-1982).
* It is estimated that $37,716,588 in property was stolen in 1982 due to this offense.
* 26,460 persons were reported arrested for theft in 1982. Of these, 77.2 percent were adults and 22.8 percent were juveniles.

FIGURE 4.6.1

4.7 MOTOR VEHICLE THEFT

DEFINITION

Motor vehicle theft is the theft or attempted theft of a motor vehicle. A motor vehicle is defined as a self-propelled vehicle that runs on the surface and not on rails. Motor vehicles include automobiles, trucks, buses, motorcycles, motor scooters, snowmobiles, etc. Motor vehicle theft offenses are reported on a per vehicle basis.

1982 SUMMARY ANALYSIS

* There were 15,767 motor vehicle thefts reported during 1982 which was an 11.8 percent decrease from 1981.

* One motor vehicle theft occurred every 33.3 minutes.

* Motor vehicle theft accounted for 6.8 percent of the Total Crime Index and 7.5 percent of all Property Index offenses.

* The motor vehicle theft rate per 100,000 population was 356.8 in 1982 compared to 402.5 in 1981.

* Of vehicles stolen in 1982, it is estimated that 62.9 percent were recovered.

* There was an 15.1 percent decrease in motor vehicle theft in 1982 compared to the annual ten year average (1973-1982).

* It is estimated that the cost of vehicles stolen in 1982 was $59,699,696.

* 1,631 persons were reported arrested for motor vehicle theft in 1982. Of these, 67.8 were adults and 32.2 percent were juveniles.

MOTOR VEHICLE THEFT SUMMARY: 1981 and 1982

4.8 ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded. Arson offenses are reported on an incident by incident basis.

1982 SUMMARY ANALYSIS

* There were 1,689 arsons reported in 1982 which was a 9.2 percent decrease from 1981.
* One arson was reported every 5.2 hours.
* Arsons accounted for 0.7 percent of the Total Crime Index and 0.8 percent of all Property Index Offenses.
* The arson rate per 100,000 population was 38.4 in 1982 compared to 44.0 in 1981.
* Residential dwellings accounted for 45.8 percent of all types of property destroyed by arson. Motor vehicles accounted for 21.6 percent.
* It is estimated that arson accounted for $20,987,987 in property loss in 1982.
* 394 persons were reported arrested for arson in 1982. Of these, 76.4 percent were adults and 23.6 percent were juveniles.

TABLE 5.0.8

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants and arrests in connection with negligent manslaughter in traffic accidents are not scored. Included are those persons arrested but released without being formally charged.

CRIME INDEX: The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. They were selected because of their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. Definitions of each of the offenses making up the Crime Index are provided in the section entitled "Missouri Detail Crime Index Analysis". In addition, refer to Crime Offense in this section for an explanation of how each of these types of offenses are reported to the UCR program.

CRIME OFFENSE: In the UCR Program, the offenses of murder, forcible rape and aggravated assault are crimes against persons. For these crimes, one offense is counted for each victim. Robbery, burglary, theft, motor vehicle theft and arson are crimes against property. For these crimes, with the exception of motor vehicle theft, one offense is counted for each distinct operation. In the case of motor vehicle theft, one offense is counted for each stolen vehicle.

JUVENILE: A person under 18 years of age.

JUVENILE ARREST: Juvenile arrests do not include law enforcement contacts with juveniles where no offense has been committed. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored since they have not committed any crime.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period - Value in Base Period}}{\text{Value in Base Period}} \quad \text{X} \quad 100\%$$

POPULATION: The total number of persons residing in a jurisdiction based on United States Census data.

QUARTILE: The value that marks the boundary between two consecutive intervals in a frequency distribution of four intervals with each containing one quarter of the total population.

RATE: Rates are indicators of reported crime activity standardized by the population of those agencies reporting the activity. Two (2) types of rates are provided: offense rates and arrest rates.

The offense rate formula is:

$$\frac{\text{Number of Offenses Reported x 100,000}}{\text{Population of Reporting Agency(ies)}}$$

The arrest rate formula is:

$$\frac{\text{Number of Arrests Reported x 100,000}}{\text{Population of Reporting Agency(ies)}}$$

STRONG ARMED ROBBERY: A robbery wherein no weapons were used but tactics (limited to the use of personal weapons such as hands, arms, feet, fists, teeth, etc.) were employed to deprive the victim of his/her property.

TIME SERIES: Time-series analysis was used in the Digest to forecast future crime and arrest activity. With this technique, data for past periods (e.g., years, months) were used as the basis for projecting levels of future activity. Ten years of past data normally were used to make these projections.

The technique used to project crime and arrest activity was Exponential Smoothing (available through the SAS Econometric Time Series software package). Use of this technique took into consideration the limited number of data points in the time series as well as whether or not the time series were best characterized as linear or nonlinear. In applying the smoothing technique greater weight was given to the more recent data values than to the earlier data values when projecting future levels of activity.

FOREWORD

During the next several years, Missouri will be receiving federal funds as a result of recently enacted legislation by Congress. These funds are targeted for selected criminal justice programs and states must prepare formal plans and problem assessment statements to qualify for these funds. A certain amount of funds will be allocated to local criminal justice agencies which will require additional planning and problem assessment to qualify for funding.

As with any planning effort, accurate data can be extremely useful to the staff responsible for identifying problem situations. Accurate data on crime trends in Missouri are now available with the 1983 Missouri Crime and Arrest Digest. This document presents a vast compilation of crime and arrest statistics from 1974 through 1983 as well as projected levels of crime activity through 1987.

You should also have a copy of the 1982 Missouri Law Enforcement Employment and Assault Report which was published in October, 1984. As we all begin to establish plans and priorities for 1985, these two documents will hopefully be useful to you. If you have a need for additional research material, contact the Missouri Statistical Analysis Center staff directly for assistance.

Richard C. Rice, Director
Missouri Department of Public Safety

ACKNOWLEDGEMENTS

Data used in the preparation of the Missouri Crime and Arrest Digest were largely drawn from the Federal Bureau of Investigation's Uniform Crime Reporting System. Missouri law enforcement agencies voluntarily report crime, arrest, and other activities into this System.

A special note of thanks is given to the Federal Bureau of Investigation for providing the Missouri Statistical Analysis Center with computerized files which contain data on crime and arrest activity in the State of Missouri. In addition, the staff of the Federal Bureau of Investigation, Uniform Crime Reporting Section provided invaluable technical assistance in converting these files for data analysis purposes.

Recognition is also given to all the Missouri law enforcement agencies who so conscientiously reported to the Federal Bureau of Investigation's Uniform Crime Reporting System. Without the participation of the Missouri law enforcement community in reporting such activity, the publication of this Digest would not be possible.

The Missouri State Highway Patrol and, in particular, the Information Systems Division significantly contributed to the development of this Digest. They provided the computer facility and data processing resources necessary to organize and display the data contained in this document.

Finally, appreciation is extended to the U.S. Department of Justice, Bureau of Justice Statistics for providing grant funds to support the development, publication, and dissemination of all criminal justice publications produced by the Missouri Statistical Analysis Center.

Martin P. Carso Jr., Director
Missouri Statistical Analysis Center

EXECUTIVE SUMMARY

The purpose of this Digest is to provide criminal justice authorities and other interested parties with summary data on crime and law enforcement activity in the State of Missouri.

The Digest is produced annually by the Missouri Statistical Analysis Center (SAC). The primary source of data for the Digest is the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting System (UCR). Although this publication contains Missouri crime and arrest activity from 1974 through 1983, emphasis is placed on data reported in the most recent year (1983).

The Crime Index is the sum of eight major offenses and is used to measure the magnitude of crime in the United States. The major offenses are included in the index because of their frequency of occurrence and the fact that they are most likely to be reported to law enforcement agencies. These eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. The following is a brief description of Missouri's 1983 crime and arrest activity associated with these types of criminal offenses.

In 1983, a total of 214,023 Crime Index offenses were reported in the State of Missouri. This was an 8.2 percent reduction compared to 1982. In 1983, one Index Crime was committed every 2.5 minutes. In 21.7 of every 100 Crime Index offenses, the cases were cleared by arrest or exceptional means.

Violent offenses made up 10.7 percent of the total 1983 Missouri Crime Index. There were 22,884 Violent Index offenses reported in 1983, a decrease of 5.6 percent compared to 1982. A violent offense was committed in Missouri every 23.0 minutes. In 50.0 of every 100 Violent Index offenses, the cases were cleared by arrest or exceptional means. A brief analysis of each type of Violent Index offense is given below.

- There were 379 murders reported in 1983, a decrease of 16.5 percent compared to 1982. While murder is the most serious Index offense, it made up only 0.2 percent of the total 1983 Missouri Crime Index. One murder was committed in the State every 23.1 hours. In 79.5 of every 100 murders, the cases were cleared by arrest or exceptional means.

- There were 1,266 forcible rapes reported in 1983, an increase of 3.1 percent compared to 1982. Forcible rape accounted for 0.6 percent of the total 1983 Missouri Crime Index. One forcible rape was reported committed every 6.9 hours. In 59.2 of every 100 forcible rapes, the cases were cleared by arrest or exceptional means.

- There were 8,223 robberies reported in 1983, a decrease of 12.5 percent compared to 1982. Robbery accounted for 3.8 percent of the total 1983 Missouri Crime Index. One robbery occurred every 1.1 hours. In 31.0 of every 100 robberies, the cases were cleared by arrest or exceptional means.

- There were 13,016 aggravated assaults reported in 1983, a decrease of 1.0 percent compared to 1982. Aggravated assault accounted for 6.1 percent of the total 1983 Missouri Crime Index. One aggravated assault occurred every 40.4 minutes. In 60.4 of every 100 aggravated assaults, the cases were cleared by arrest or exceptional means.

Property offenses made up 89.3 percent of the total 1983 Missouri Crime Index. There were 191,139 Property Index offenses reported in 1983, a decrease of 8.5 percent compared to 1982. It is estimated that property offenses accounted for $169,550,576 in property stolen or destroyed. One such offense occurred every 2.7 minutes in the State. In 18.3 of every 100 Property Index offenses, the cases were cleared by arrest or exceptional means. A brief analysis of each type of Property Index offense is given below.

- There were 56,221 burglaries reported in 1983, a decrease of 12.9 percent compared to 1982. Burglary accounted for 26.3 percent of the total 1983 Missouri Crime Index. One burglary occurred every 9.3 minutes and it is estimated that $44,325,761 in property was stolen in 1983 due to this offense. In 16.9 of every 100 burglaries, the cases were cleared by arrest or exceptional means.

- There were 118,295 thefts reported in 1983, a decrease of 6.8 percent compared to 1982. Theft accounted for 55.3 percent of the total 1983 Missouri Crime Index. One theft occurred every 4.4 minutes and it is estimated that $35,018,869 in property was stolen in 1983 due to this offense. In 19.2 of every 100 thefts, the cases were cleared by arrest or exceptional means.

- There were 15,055 motor vehicle thefts reported in 1983, a decrease of 4.5 percent compared to 1982. Motor vehicle theft accounted for 7.0 percent of the total 1983 Missouri Crime Index. One motor vehicle theft occurred every 34.9 minutes and it is estimated that $62,406,137 in property was stolen in 1983 due to this offense. In 15.9 of every 100 motor vehicle thefts, the cases were cleared by arrest or exceptional means.

- There were 1,568 arsons reported in 1983, a decrease of 7.2 percent compared to 1982. Arson accounted for 0.7 percent of the total 1983 Missouri Crime Index. One arson occurred every 5.6 hours and it is estimated that $27,799,809 in property was destroyed due to arson in 1983. In 22.5 of every 100 arsons, the cases were cleared by arrest or exceptional means.

INTRODUCTION

This Digest was prepared by the Missouri Statistical Analysis Center (SAC) and presents selected data on crime and arrest activity in Missouri from 1974 through 1983. Emphasis has been placed on the most recent year's (1983) crime and arrest activity. Information reported in this Digest was submitted on a voluntary basis by Missouri law enforcement agencies to the Federal Bureau of Investigation's (FBI), Uniform Crime Reporting (UCR) Program.

The national UCR Program was initiated in 1930 by the Committee on Uniform Crime Reports of the International Association of Chiefs of Police (IACP). This committee developed uniform offense and arrest classifications as well as reporting procedures which could be used by law enforcement agencies throughout the nation. The FBI was designated to administer the Program and became the national clearinghouse for UCR data. The Committee on Uniform Crime Reports of the IACP continues to serve the national program in an advisory capacity. In 1966, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body for this program and to promote reporting to the UCR Program.

Crime data are, for the most part, collected on a monthly basis in the UCR Program. The FBI provides report forms, tally sheets, and self-addressed envelopes to Missouri law enforcement agencies who complete and return them to the FBI.

It should be noted that there are limitations associated with the information displayed in this report. The fact that this program is voluntary in nature in the State of Missouri increases the problems associated with the completeness and representativeness of the information being captured and analyzed. Certain Missouri law enforcement agencies either do not report to the program or they send incomplete data. In most states, reporting to this program is mandatory for law enforcement agencies through the enactment of state statute.

To reduce the problems associated with both non-reporting and incomplete reporting, a number of states and the FBI have used mathematical techniques to estimate total yearly crime and arrest activity. No such techniques have been applied to the data reported in this Digest. Reliance has been placed on displaying crime and arrest rates on a per 100,000 population basis. This type of data display identifies crime and arrest activity in relation to the population of the jurisdictions which report the activity.

As a result, discrepancies may be found if comparisions are made with FBI UCR publications covering the same subject area for the State of Missouri. In all instances, the FBI publications indicate when an estimation technique was used. Discrepancies may also be noted when examining actual reported figures. This is a result of updates having been made to the UCR files between the time the FBI data were processed and the time the SAC analysis was performed.

The crime and arrest data contained in this publication are segmented into five parts. The first section displays the Missouri Crime Clock. This clock offers an overview of the frequency of occurrence of Crime Index offenses committed in the State in relation to time. The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. The eight offenses making up the total Crime Index are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The second section provides data related to Crime Index offenses committed in the State of Missouri. Its purpose is to provide a comparison of the various types of Crime Index offenses so that their relative importance can be assessed. In addition, Crime Index activity is displayed by geographical regions of the State and also over time to observe trends. The third section presents data on arrest activity and clearance rates associated with Crime Index offenses as well as arrest activity associated with other classes of criminal offenses. These data provide an appreciation of criminal enforcement activity being performed in the State of Missouri by class of crime. The fourth section provides a series of data and analysis related to each of the eight types of Crime Index offenses. Data are provided on crime activity, clearance rates, crime patterns, and arrest activity associated with each of these offenses. Finally, the last section provides summary data on Crime Index offenses and arrest activity for specific law enforcement jurisdictions in the State of Missouri.

1.0 MISSOURI CRIME CLOCK

THE CRIME CLOCK SUMMARIZES CRIMINAL ACTIVITY IN THE STATE OF MISSOURI DURING 1983 IN RELATION TO TIME. FROM THIS PERSPECTIVE, AN APPRECIATION OF THE RELATIVE FREQUENCY OF VARIOUS CRIMINAL OFFENSES CAN BE OBTAINED. THE CRIME CLOCK SHOULD BE VIEWED WITH CARE. BEING THE MOST AGGREGATE REPRESENTATION OF UCR DATA, IT IS DESIGNED TO CONVEY THE ANNUAL REPORTED CRIME EXPERIENCE BY SHOWING THE RELATIVE FREQUENCY OF OCCURRENCE OF THE INDEX OFFENSES. THIS MODE OF DISPLAY SHOULD NOT BE TAKEN TO IMPLY A REGULARITY IN THE COMMISSION OF CRIME; RATHER, IT REPRESENTS THE ANNUAL RATIO OF CRIME TO FIXED TIME INTERVALS.

MISSOURI CRIME CLOCK

1983

ONE INDEX CRIME OFFENSE
EVERY 2.5 MINUTES

ONE VIOLENT CRIME
EVERY 23.0 MINUTES

- ONE MURDER EVERY 23.1 HOURS
- ONE FORCIBLE RAPE EVERY 6.9 HOURS
- ONE ROBBERY EVERY 1.1 HOURS
- ONE AGGRAVATED ASSAULT EVERY 40.4 MINUTES

ONE PROPERTY CRIME
EVERY 2.7 MINUTES

- ONE BURGLARY EVERY 9.3 MINUTES
- ONE THEFT EVERY 4.4 MINUTES
- ONE MOTOR VEHICLE THEFT EVERY 34.9 MINUTES
- ONE ARSON EVERY 5.6 HOURS

2.0 MISSOURI CRIME INDEX COMPARISON ANALYSIS

A SERIES OF TABLES AND FIGURES SUMMARIZES CRIME INDEX OFFENSES COMMITTED IN THE STATE OF MISSOURI. THE PURPOSE OF THESE DISPLAYS IS TO COMPARE THE VARIOUS TYPES OF CRIME INDEX OFFENSES BEING COMMITTED ACCORDING TO THEIR RELATIVE CONTRIBUTION TO THE CRIME INDEX. IN ADDITION, CRIME INDEX OFFENSE RATES ARE DISPLAYED BY GEOGRAPHICAL REGIONS OF THE STATE AND OVER TIME IN ORDER TO OBSERVE TRENDS.

CRIME INDEX OFFENSES, STATE OF MISSOURI

BURGLARY	1,544.5	1,602.6	1,471.2	1,376.8	1,402.6	1,495.4	1,756.2	1,639.4	1,460.3	1,276.3
THEFT	2,588.7	3,155.5	2,993.0	2,583.4	2,483.6	2,677.2	2,988.8	2,981.1	2,871.2	2,685.5
MOTOR VEHICLE THEFT	464.8	516.6	419.3	408.6	394.5	436.2	445.5	402.5	356.8	341.8
ARSON[2]	-	-	-	-	-	-	51.3	44.0	38.4	35.9

[1] Crime Index offense rates relate to crime index offenses reported by law enforcement agencies in relation to their share of the State's population. They are computed on a per 100,000 basis.

[2] Arson was not reported as an index offense until 1980. In this table, arson figures are included in the Total Index and Property Index total for 1980 - 1983.

TABLE 2.0.3

PROPERTY CRIME INDEX

ECONOMIC ANALYSIS

(PROPERTY STOLEN/DESTROYED)

1983

TYPE	LOSS PER[1] OFFENSE	ESTIMATE[2] TOTAL OFFENSES
BURGLARY	$788.42	$44,325,761
THEFT	296.03	35,018,869
MOTOR VEHICLE THEFT	4,145.21	62,406,137
ARSON	17,729.47	27,799,809
TOTAL	-	$169,550,576

[1] The dollar loss per offense was calculated using only those property offenses for which law enforcement agencies reported an actual dollar amount for the property stolen or destroyed.

[2] The estimate was calculated by multiplying the dollar loss per offense by the total number of such offenses that were reported in 1983.

TABLE 2.0.4

CRIME INDEX OFFENSE RATES, STATE OF MISSOURI[1]

FIGURE 3.0.3

4.0 MISSOURI DETAIL CRIME INDEX ANALYSIS

A SERIES OF TABLES AND FIGURES SUMMARIZES CRIME ACTIVITY, CLEARANCE RATES, CRIME PATTERNS, AND ARREST ACTIVITY ASSOCIATED WITH SPECIFIC TYPES OF CRIME INDEX OFFENSES COMMITTED IN THE STATE OF MISSOURI. DETAIL ANALYSIS IS PROVIDED ON THE FOLLOWING TYPES OF CRIME:

- MURDER
- FORCIBLE RAPE
- ROBBERY
- AGGRAVATED ASSAULT
- BURGLARY
- THEFT
- MOTOR VEHICLE THEFT
- ARSON

4.1 MURDER

DEFINITION

Murder and non-negligent manslaughter, is the willful killing of one human being by another. Not included in this offense classification are deaths caused by negligence, suicide, accident, justifiable homicide (the killing of a felon by a peace officer in the line of duty or a private citizen during the commission of a felony) and attempts to murder (these are classified as aggravated assaults). Murder offenses are reported on a per victim basis.

1983 SUMMARY ANALYSIS

- There were 379 murders reported during 1983 which was a 16.5 percent reduction from 1982.
- One murder was reported every 23.1 hours.
- Murder accounted for 0.2 percent of the Total Crime Index and 1.7 percent of all Violent Index offenses.
- The murder rate per 100,000 population was 8.6 in 1983 compared to 10.3 in 1982.
- In 1983, 79.5 of every 100 murders were cleared by arrest or exceptional means.
- 332 persons were reported arrested for murder in 1983. Of these, 91.9 percent were adults and 8.1 percent were juveniles.
- Of the murder victims reported, 75.2 percent were male and 24.8 percent were female. Of the total, 90.7 percent were adults and 9.3 percent were juveniles.
- A firearm was used by 59.0 percent of the offenders associated with murders.

MURDER SUMMARY: 1982 and 1983

Year	Number of Offenses	Rate per 100,000 Population

FIGURE 4.1.1

4.2 FORCIBLE RAPE

DEFINITION

Forcible rape is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included. However, statutory rape (without force), sex attacks on males and other types of sex offenses are not included in this category. Forcible rape offenses are reported on a per victim basis.

1983 SUMMARY ANALYSIS

- There were 1,266 rapes reported during 1983 which was a 3.1 percent increase over 1982.
- One rape was reported every 6.9 hours.
- Rape accounted for 0.6 percent of the Total Crime Index and 5.5 percent of all Violent Index offenses.
- The rape rate per 100,000 population was 28.7 in 1983 compared to 27.8 in 1982.
- Actual rape by force constituted 79.9 percent of all reported rapes while attempted rapes accounted for 20.1 percent.
- In 1983, 59.2 of every 100 rapes were cleared by arrest or exceptional means.
- 978 persons were reported arrested for rape in 1983.
- Of those persons arrested for rape in 1983, 85.8 percent were adults and 14.2 percent were juveniles.

[1] Rape offense rates are based on the incidence of rape reported by law enforcement agencies in relation to their share of the State's population. They are computed on a per 100,000 population basis.

FIGURE 4.2.1

4.3 ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. Robbery involves a theft or larceny but is aggravated by the element of force or threat of force. Robbery offenses are reported on an incident-by-incident basis.

1983 SUMMARY ANALYSIS

- There were 8,223 robberies reported in 1983 which was a 12.5 percent decrease from 1982.
- One robbery was reported every 1.1 hours.
- Robbery accounted for 3.8 percent of the Total Crime Index and 35.9 percent of all Violent Index offenses.
- The robbery rate per 100,000 population was 186.7 in 1983 compared to 212.7 in 1982.
- In 40.6 percent of all robberies, a firearm was used.
- Street robbery was the most prevalent class of robbery accounting for 66.3 percent of all such offenses.
- It is estimated that $4,837,755 in property was stolen in 1983 due to this offense.
- In 1983, 31.0 of every 100 robberies were cleared by arrest or exceptional means.
- 2,535 persons were reported arrested for robbery in 1983. Of these, 80.6 percent were adults and 19.4 percent were juveniles.

ROBBERY SUMMARY: 1982 and 1983

FIGURE 4.3.1

4.4 AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack or attempted attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. All assaults or attempted assaults by one person upon another with the intent to kill, maim or inflict severe bodily injury with the use of any dangerous weapon are classified under this category of offense. Aggravated assault offenses are reported on a per victim basis.

1983 SUMMARY ANALYSIS

- There were 13,016 aggravated assaults reported in 1983 which was a 1.0 percent decrease from 1982.
- One aggravated assault was reported every 40.4 minutes.
- Aggravated assault accounted for 6.1 percent of the Total Crime Index and 56.9 percent of all Violent Index offenses.
- The aggravated assault rate per 100,000 population was 295.5 in 1983 compared to 297.7 in 1982.
- A firearm was used in 22.7 percent of the cases.
- In 1983, 60.4 of every 100 aggravated assaults were cleared by arrest or exceptional means.
- 7,351 persons were reported arrested for aggravated assault in 1983. Of these, 88.9 percent were adults and 11.1 percent were juveniles.

4.5 BURGLARY

DEFINITION

Burglary is the unlawful entry or attempted unlawful entry of a structure to commit a felony or a theft. Burglary offenses are reported on an incident-by-incident basis.

1983 SUMMARY ANALYSIS

- There were 56,221 burglaries reported during 1983 which was a 12.9 percent decrease from 1982.
- One burglary was reported every 9.3 minutes.
- Burglary accounted for 26.3 percent of the Total Crime Index and 29.4 percent of all Property Index offenses.
- The burglary rate per 100,000 population was 1,276.3 in 1983 compared to 1,460.3 in 1982.
- Of all burglaries, 68.8 percent involved a residential dwelling and 67.4 percent were accomplished by forcible entry.
- It is estimated that $44,325,761 in property was stolen in 1983 due to this offense.
- In 1983, 16.9 of every 100 burglaries were cleared by arrest or exceptional means.
- 8,189 persons were reported arrested for burglary in 1983. Of these, 70.2 percent were adults and 29.8 percent were juveniles.

BURGLARY SUMMARY: 1982 and 1983

Year	Number of Offenses	Rate per 100,000 Population

FIGURE 4.5.1

4.6 THEFT

DEFINITION

Theft is the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. Attempted thefts are also included. This category includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts or accessories, bicycle thefts, etc., in which no use of force, violence or fraud occurs. It does not include embezzlement, "con" games, forgery or worthless checks. Motor vehicle theft is also excluded inasmuch as it is a separate crime index offense. Theft offenses are reported on an incident-by-incident basis.

1983 SUMMARY ANALYSIS

- There were 118,295 thefts reported during 1983 which was a 6.8 percent decrease over 1982.
- One theft was reported every 4.4 minutes.
- Theft accounted for 55.3 percent of the Total Crime Index and 61.9 percent of all Property Index offenses.
- The theft rate per 100,000 population in 1983 was 2,685.5 compared to 2,871.2 in 1982.
- Of all thefts, 45.1 percent involved the taking of vehicle parts/accessories or other types of property from a vehicle.
- It is estimated that $35,018,869 in property was stolen in 1983 due to this offense.
- In 1983, 19.2 of every 100 thefts were cleared by arrest or exceptional means.
- 23,244 persons were reported arrested for theft in 1983. Of these, 77.7 percent were adults and 22.3 percent were juveniles.

FIGURE 4.6.1

4.7 MOTOR VEHICLE THEFT

DEFINITION

Motor vehicle theft is the theft or attempted theft of a motor vehicle. By definition, a motor vehicle is a self-propelled vehicle that runs on the surface and not on rails. Motor vehicles include automobiles, trucks, buses, motorcycles, motor scooters, snowmobiles, etc. Motor vehicle theft offenses are reported on a per vehicle basis.

1983 SUMMARY ANALYSIS

- There were 15,055 motor vehicle thefts reported during 1983 which was a 4.5 percent decrease from 1982.
- One motor vehicle theft occurred every 34.9 minutes.
- Motor vehicle theft accounted for 7.0 percent of the Total Crime Index and 7.9 percent of all Property Index offenses.
- The motor vehicle theft rate per 100,000 population was 341.8 in 1983 compared to 356.8 in 1982.
- Of vehicles stolen in 1983, it is estimated that 67.6 percent were recovered.
- It is estimated that the cost of vehicles stolen in 1983 was $62,406,137.
- In 1983, 15.9 of every 100 motor vehicle thefts were cleared by arrest or exceptional means.
- 1,099 persons were reported arrested for motor vehicle theft in 1983. Of these, 70.1 percent were adults and 29.9 percent were juveniles.

[1] Motor Vehicle Theft offense rates are based on the incidence of motor vehicle theft reported by law enforcement agencies in relation to their share of the State's population. They are computed on a per 100,000 population basis.

FIGURE 4.7.1

4.8 ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded. Arson offenses are reported on an incident-by-incident basis.

1983 SUMMARY ANALYSIS

- There were 1,568 arsons reported in 1983 which was a 7.2 percent decrease from 1982.
- One arson was reported every 5.6 hours.
- Arsons accounted for 0.7 percent of the Total Crime Index and 0.8 percent of all Property Index Offenses.
- The arson rate per 100,000 population was 35.9 in 1983 compared to 38.4 in 1982.
- Residential dwellings accounted for 47.6 percent of all types of property destroyed by arson. Motor vehicles accounted for 20.6 percent.
- It is estimated that arson accounted for $27,799,809 in property loss in 1983.
- In 1983, 22.5 of every 100 arsons were cleared by arrest or exceptional means.
- 296 persons were reported arrested for arson in 1983. Of these, 74.0 percent were adults and 26.0 percent were juveniles.

SEX	AGE GROUPS	REPORTED	% OF TOTAL ARSON ARRESTS
MALE	ADULTS	192	64.9
	JUVENILES	76	25.7
FEMALE	ADULTS	27	9.1
	JUVENILES	1	0.3
TOTAL		296	100.0

TABLE 4.8.4

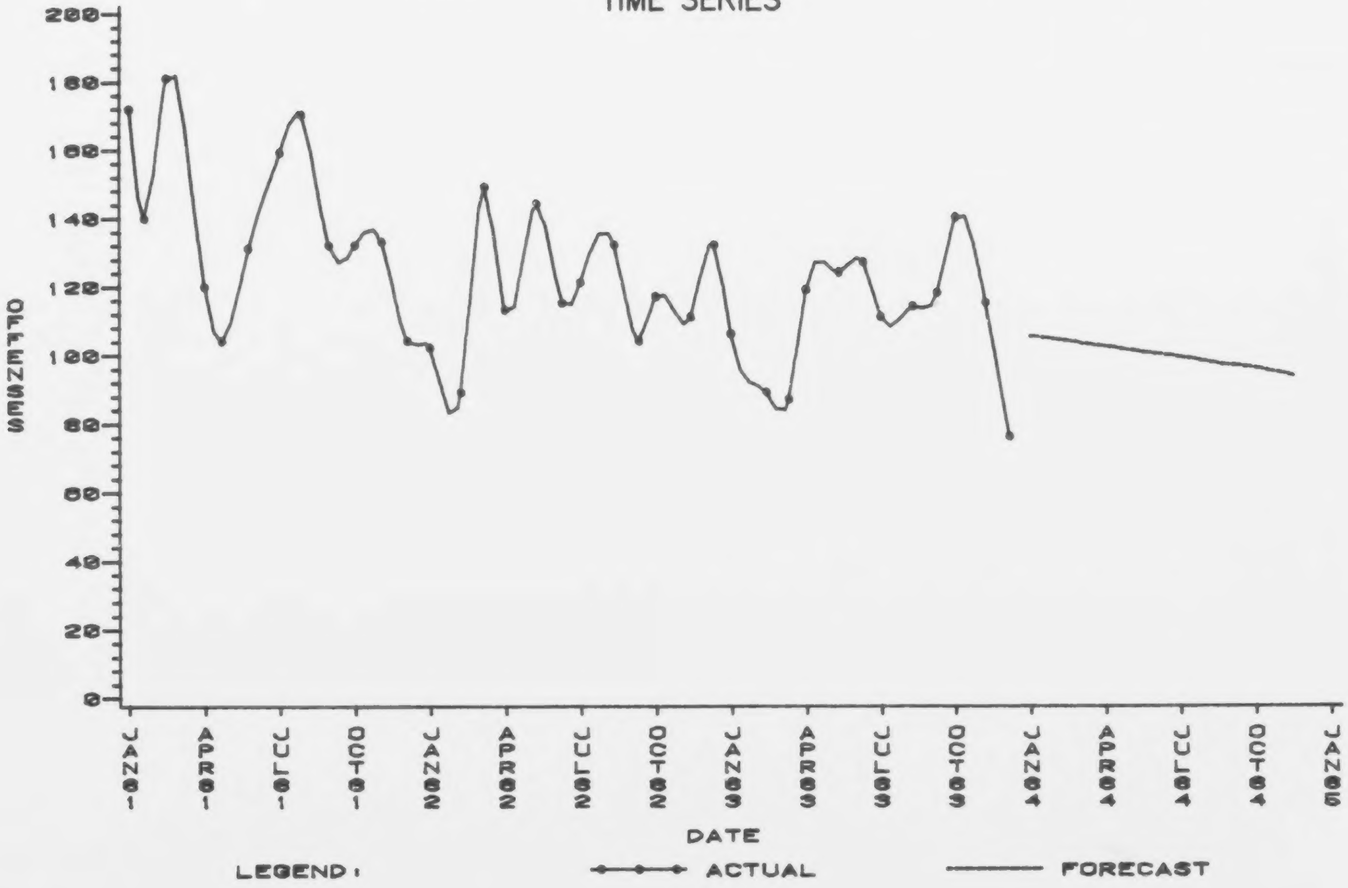
ARSON ARRESTS BY RACE AND AGE GROUP

1983

RACE	AGE GROUPS	REPORTED	% OF TOTAL ARSON ARRESTS
WHITE	ADULTS	151	51.2
	JUVENILES	63	21.4
BLACK	ADULTS	65	22.0
	JUVENILES	14	4.7
AMERICAN INDIAN	ADULTS	2	0.7
	JUVENILES	0	0.0
UNKNOWN		1	-
TOTAL		296	100.0

TABLE 4.8.5

ARSON OFFENSES, STATE OF MISSOURI[1]
TIME SERIES



---

[1] Rates were not used for the arson time series projection due to the limited amount of data available. To eliminate the problem of both non-reporting and incomplete reporting, only arson activity for those law enforcement agencies which completely reported from 1981-1983 were included in this time series projection. As a result, this time series should only be used to assess the trend associated with this type of offense.

FIGURE 4.8.1

5.0 MISSOURI LAW ENFORCEMENT AGENCY CRIME AND ARREST ANALYSIS

A SERIES OF TABLES SUMMARIZES CRIME INDEX OFFENSE AND ARREST ACTIVITY ASSOCIATED WITH LAW ENFORCEMENT JURISDICTIONS IN THE STATE OF MISSOURI. THESE DATA DISPLAYS PROVIDE AN OVERVIEW OF THE EXTENT OF THE CRIME PROBLEM WITHIN MISSOURI COMMUNITIES.

TABLE 5.0.8

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants and arrests in connection with negligent manslaughter in traffic accidents are not scored. Included are those persons arrested but released without being formally charged.

CLEARANCE: The resolution of a criminal offense by the arrest, charging and turning over to the court for prosecution of one or more persons alleged to have committed a crime. An offense can also be cleared by exceptional means when the law enforcement agency has: 1) established the identity of the offender, 2) has enough information to support an arrest, charge and prosecution in court, 3) the exact location of the offender is known so that he/she could be taken into custody and 4) there is some reason outside law enforcement control that precludes arresting, charging and prosecuting the offender, (Ex. offender dies).

CLEARED OFFENSES ONLY JUVENILES: The number of clearances for an offense in which only juveniles were arrested or were identified as the offender but for some valid reason could not be arrested divided by the total number of clearances for that offense expressed as a percentage. The formula is:

$$\frac{\text{Number of Offenses Cleared Involving Only Juveniles}}{\text{Number of Clearances}} \quad X \quad 100$$

CLEARANCE RATES: The number of clearances divided by the total number of offenses, expressed as a percentage. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \quad X \quad 100$$

CRIME INDEX: The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. They were selected because of their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. Definitions of each of the offenses making up the Crime Index are provided in the section entitled "Missouri Detail Crime Index Analysis". In addition, refer to Crime Offense in this section for an explanation of how each type of offense is reported to the UCR Program.

CRIME OFFENSE: In the UCR Program, the offenses of murder, forcible rape and aggravated assault are crimes against persons. For these crimes, one offense is counted for each victim. Robbery, burglary, theft, motor vehicle theft and arson are crimes against property. For these crimes, with the exception of motor vehicle theft, one offense is counted for each distinct operation. In the case of motor vehicle theft, one offense is counted for each stolen vehicle.

JUVENILE: A person under 18 years of age.

JUVENILE ARREST: Juvenile arrests do not include law enforcement contacts with juveniles where no offense has been committed. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored since they have not committed any crime.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period - Value in Base Period}}{\text{Value in Base Period}} \quad X \quad 100$$

POPULATION: The total number of persons residing in a jurisdiction based on United States Census data.

QUARTILE: The value that marks the boundary between two consecutive intervals in a frequency distribution of four intervals with each containing one quarter of the total population.

RATE: Rates are indicators of reported crime activity standardized by the population of those agencies reporting the activity. Two (2) types of rates are provided: offense rates and arrest rates.

The offense rate formula is:

$$\frac{\text{Number of Offenses Reported} \times 100{,}000}{\text{Population of Reporting Agency(ies)}}$$

The arrest rate formula is:

$$\frac{\text{Number of Arrests Reported} \times 100{,}000}{\text{Population of Reporting Agency(ies)}}$$

STRONG ARMED ROBBERY: A robbery wherein no weapons were used but tactics (limited to the use of personal weapons such as hands, arms, feet, fists, teeth, etc.) were employed to deprive the victim of his/her property.

TIME SERIES: Time-series analysis was used in the Digest to forecast future crime and arrest activity. With this technique, data for past periods (e.g., years, months) were used as the basis for projecting levels of future activity. Ten years of past data normally were used to make these projections.

In most instances, crime and arrest rates on a per 100,000 population basis were used in making the forecasts. Crime and arrest rates reflect reported crime and arrest activity in relation to the population of the jurisdictions which report the activity. Using rates, rather than actual crime and arrest incidents reported during past periods, helps reduce the problem of both incomplete and non-reporting associated with the data used.

The technique used to project crime and arrest activity was Exponential Smoothing (available through the SAS Econometrics and Time Series software package). Use of this technique took into consideration the limited number of data points in the time series, as well as whether or not the time series were best characterized as linear or nonlinear. In applying the smoothing technique greater weight was given to the more recent data values than to the earlier data values when projecting future levels of activity.
